

ROTARY TOOLS – Drill Pipes

Drill Pipe with API Tool Joints – are available from USExploration Equipment Company including API Regular, API Internal Flush (IF) and API Full-Hole. Drill Pipes can be manufactured with wrench flats at one end or at both ends, depending on your preference and the breakout system on your existing machine. When ordering simply specify the outside diameter, the desired thread type, and the shoulder-to-shoulder length that best fits your “top-head” or “table” drive drill rig...

Drill Pipe with Wrench Flats at Both Ends & API Tool Joints
