

ROTARY TOOLS – Hydraulic Rod Clamps

K-Series Tri-Seal Packer

K-Series Packers – also referred to as Tri-Seals are available from USExploration Equipment Company and are designed to seal around Schedule-40 or Schedule-80 PVC. Excellent for inhibiting flowing sands from migrating up or down the bore hole and typically made from neoprene rubber in two hardness ratings (Standard or Soft). When ordering simply specify the Rods and Casing that you are working with and the general down-hole conditions
