

SOLID STEM AUGERS – Auger Holders

Auger Holders are available with single handle or double style (above).

Auger Holders (Forks or Pans) for Solid Stem Augers – from

USExploration Equipment Company are used to keep auger assemblies from heading back down the bore hole, once the auger extraction process begins. This simple tool slides in between the “Pitch” of the flight, and tightly up against the outside of the Axle (mid-body) of the auger itself. Since the Holder diameter is larger than the bore hole created by your augers, the fork serves as your only chance to keep tools from heading back down the hole, once you have tripped (TD) off bottom...

Auger Assembly Hole Size	Hex Shank Connection	Solid Stem Auger Series	Assembly Weight	Assembly Part Number
3-1/2-inch (89mm) Thru 6-inch (152mm)	1-1/8-inch (29mm)	1500	9-Pounds (4.1 kg)	31004
4-1/2-inch (114mm) Thru 14-inch (356mm)	1-5/8-inch (41mm)	2000	14-Pounds (6.4 kg)	31005
10-inch (254mm) Thru 12-inch (305mm)	1-5/8-inch (41mm)	2875	21-Pounds (9.5 kg)	31007
6-inch (152mm) Thru 14-inch (356mm)	2-inch (51mm)	2625	21-Pounds (9.5 kg)	31008
