

Casing / Rods - GP 88 (2.5 inch ID x 3.5 inch OD)

GP 88 can be considered a rod or casing depending on what application it is used for. This rod is a great "working rod" to run core barrels, the Aqua-Lock, or independently for heat loops, water sampling, injection work or seismic shot holes. It comes in either external flush or internal flush. This rod is inertia welded thick walled tool joints to thinner walled mid bodies with 4140 and 4130 respectively. The inside diameter at the coupling is 2.5 inches and the outside diameter at the couplings is 3.5 inches.
