

## PUMP PULLING ASSIST TOOL

The Pump Pulling Assist Tool is a cost effective way to pull pumps out of the well easily without the need for complicated, expensive machinery or an electric power source. The WellTech Pump Pulling Assist Tool attaches and clamps onto the well casing easily allowing your team to pull the flexible pump piping over the durable built-in tapered rollers. Its design and powder coated steel construction provide a durable, lightweight and portable solution to pulling well pumps.

### FEATURES:

- Easy to Install
- Pull Pumps with Ease
- Portable & Simple
- Inexpensive
